

# BPC-157

## PEPTIDE RESEARCH COMPOUND

### Dilution Guidelines

- Minimally 0.75–1.25 mL BAC water per 5 mg vial
- Add BAC water slowly along the inner wall—avoid injecting directly onto the peptide
- Allow vial and BAC water to reach room temperature before reconstitution
- Swirl gently—do not shake vigorously, as this may affect peptide integrity

### Appearance After Mixing

- Typically forms a clear to slightly hazy solution
- Mild foaming or sediment may appear—allow to settle and swirl gently again if needed
- Full dissolution generally occurs within 1–2 minutes

### Storage

- Store at **2–8°C (refrigerated)** after reconstitution
- Do not freeze and protect from light and air exposure
- Use within 10–21 days for optimal stability

### DISCLAIMER

This compound is provided for laboratory research purposes only. It is not intended for human or veterinary use, and no therapeutic or diagnostic claims are made.
