

**Letter from the CEO
Pure Health Peptides**

March, 2026

To our customers, research partners, and members of the scientific community,

Pure Health Peptides is committed to transparency, product integrity, and the responsible supply of research materials. As we have established a recognized and trusted position within the research peptide supply community, we have recently become aware of unauthorized individuals and entities outside the United States attempting to imitate our brand and products.

In several instances, these parties have copied or reproduced our product images, logo's packaging labels, Certificates of Analysis (CoAs), and other materials to falsely represent products as originating from Pure Health Peptides.

For clarity, we want to state the following:

- Pure Health Peptides sells products exclusively through our official website.
- We do not operate through third-party distributors, resellers, or online marketplaces.
- Our products are supplied directly to customers within the United States only.

Any website, online listing, social media posts or seller claiming to distribute Pure Health Peptides products outside these channels is not authorized by our company.

The PURE HEALTH PEPTIDES name, logo's, branding, and associated materials are protected intellectual property, and our trademark application has been formally filed. Unauthorized use of our name, trademarks, product images, labels, or documentation constitutes trademark infringement and misrepresentation.

If you have any doubt about the authenticity of a product, document, or supplier claiming to represent Pure Health Peptides, please contact us directly for verification.

We take the misuse of our brand and intellectual property very seriously and will pursue appropriate legal action against individuals or organizations engaged in counterfeiting, trademark infringement, or fraud.

We remain committed to supporting the research community with transparency, quality, and integrity.

Sincerely,
Franciscus van Gils
CEO
Pure Health Peptides
